SHOWCASE

Marriott Marquis - San Diego Marina, California, USA

The San Diego Marriott Marquis & Marina is the foremost destination for visitors to the San Diego Bay. Clad in polished metal and glass, the hotel's façade reflects the beauty of the ocean by day. With the addition of a sleek lighting solution from Traxon & e:cue, the hotel's façade now maintains its visual connection to the ocean by night. Approximately 350 linear feet of architectural waves line the entrance drive to the San Diego Marriott Marquis & Marina. To smoothly backlight the waves, Traxon & e:cue's Dot XL-3 RGB was applied to the standoff wave pieces. An ultra-bright exterior system that offers extreme flexibility in mounting and color, as well as ease of maintenance, the Dot XL-3 RGB systems were connected to an intelligent Lighting Control Engine, which allows programming of the signature blue, undulating light to be changed with ease. From sunset to sunrise, the smooth, backlit waves ensure the hotel is a landmark icon, memorably connected to the waters of San Diego Bay.
