Kempinski Ambience Hotel Delhi - Shahdara, India

Experience the new symbol of majestic modern lighting in one of the oldest capital cities in the world, where India's newest landmark is born with Kempinski Ambience Hotel Delhi. Traxon illuminates the borders of the monolith-like hotel to fulfill the client's wish for an extraordinary landmark in Delhi. Staleness white lighting using Traxon Monochrome Tubes creates concentrated even radiance due to its front diffuser, augmenting the grandeur of the building. 775 units of Traxon Monochrome Tubes distinguish the hotel's weave look borders enhancing its glorified visibility even from afar. The client wished for a static monochrome lighting design to emphasize the hotel's splendor, hence Singapore based Illuminate Lighting Design opted for Traxon Monochrome Tube to ensure a continuous straight line effect. The sleek and slim profile of Traxon Monochrome Tube with its three fixture lengths (500mm, 995mm and 1490mm) allows it to fit a wide variety of installation spaces, including the very smallest of areas and meet even the most rigorous application demands. Encased within two towers are 480 beautiful rooms and luxury suites, Kempinski Ambience Hotel is home to 70,000 sq.ft. of meeting space, the largest in a luxury hotel in India accommodating over 6000 delegates along with the largest pillar-less ballroom of 25,000 sq.ft.
