

SHOWCASE

OSRAM Lighting Solutions exhibits in Light Middle East 2015 – Dubai, UAE

With over 300 exhibitors from different lighting companies across the world, Light Middle East is the regional premier event which was held in Dubai International Convention and Exhibition Centre on 6-8 October 2015. The trade fair offered a platform for the lighting professionals, including manufacturer, architects, engineers and designers, to showcase their innovative lighting solutions, to explore business opportunities and to gain inspiration for their future projects and designs. Being one of the Silver Sponsors for this remarkable event, OSRAM Lighting Solutions was delighted to exhibit the innovation Mood Light™ Motion. 88 pieces of LED panels with interactive lighting system combining LED lighting and motion sensing technology were installed in the booth wall, meeting table and floor. The panels were interconnected to deliver a synchronized content without using an additional control device. The visitors enjoyed playing and touching with the dynamic and amusing lighting in OSRAM Lighting Solutions' stall that provided them an unforgettable and unique experience.
