Asakusa Sensouji Light-up Event - Tokyo, Japan

Located in Tokyo's Asakusa district, the Sensouji Temple is the city's oldest and most famous temple. One of Tokyo's major annual festivals, the Sanja Matsuri Carnival, takes place in the area surrounding the Sensouji Temple. To celebrate this event and the recent reconstruction of the ancient sactuary, the temple's Nitenmon Gate was brightly decorated with a new light. To provide ample luminosity and brightness the client used 10 Traxon Wash Shield XB-18 Warm White. Traxon narrowed the Wash Shield's beam angle by 10 degrees to accentuate the gate's shafts and facilitate a perfect outdoor lighting solution. High-powered LEDs ensured an optimal illumination of the architecture and existing color. Traxon's Wash Shield XB series allows acute flexibility including LED color and number, and beam angle, enabling customers to meet a variety of needs. Its outstanding performance makes the Wash Shield XB series the perfect solution for any outdoor application where rich washing effects or accent lighting is required.

## FEATURED PRODUCT

Wash Shield XB-18  
Warm White

## PROJECT DETAILS

Category: Architectural  
Client: Art Brain Company  
Location: Tokyo, Japan  
Designer / Architect: Satoru Sekine  
Installer: Art Brain Company  
Date: April 2010  
Traxon contact: Traxon Japan
